

Customers and Orders

This project views Customers, Sales Orders and Sales Order Details and uses the Northwind database.

- Create a form for screen Customer Orders, sample of which is attached

Customer Orders

The user selects the Customer Id from the combo box. The company name and address are displayed in the adjacent text boxes.

All the orders received from the selected customer are displayed in the grid underneath.

The order details for a selected order are then viewed in the second data grid.

The screenshot shows a Windows application window titled "CustOrders". Inside the window, there is a form with a "Customers" section containing a dropdown menu with "JK234" selected. To the right of the dropdown, there are four text boxes labeled "Company Name:", "Address:", "City:", and "Country:", with values "Jackson Tiles", "24 Main Street", "Limerick", and "Ireland" respectively. The Windows taskbar at the bottom shows the Start button, several open application windows (Inbo..., Gmail..., 2 W..., Cust..., Cust..., Cust...), and the system clock showing 11:38.
