
Program 1 Show/Modify Existing Sales Orders

Copies of Screens are attached. The program should be developed in four parts:

Part A - Show Orders for Selected Customer

Part B – Allow additional items to be added to the order (add to list view and add to SalesOrderDetails table)

Part C – Delete selected item from list view and from SalesOrderDetails table

Part D - Edit quantity ordered for a selected item and edit corresponding row in the SalesOrderDetails table

The Customer ID is selected from the Customers combo box. Customer information is displayed in the adjacent text boxes.

A group box underneath displays information relating to orders received from the selected customer. When an order number is selected from the combo box, the order details for this order displayed in a list view underneath.

The screenshot shows a Windows application window titled "MDIMain" with a menu bar containing "New Sales Order", "Modify Sales Orders", and "Dispatch Goods". The "ModifyOrders" form is active, featuring a "Customers" group box with a "Customer Id" dropdown menu (currently showing "Select Customr Id") and three text boxes for "Company Name:", "Address:", and "City:". At the bottom of the form are "Next" and "Close" buttons. The Windows taskbar at the bottom displays the Start button, several open applications including "Sales Order Screens...", "Module: BC3 Visual...", "VB.NET 2007 2008", and "ProcessSalesOrder...", and the system clock showing "15:41".
